

Phantom Accessory Fitting

To attach accessories onto the scooter you will need an accessory bracket for the seat.
You will need to drill 2 holes in the bar across the back of the seat to fit the Accessory bracket.
When more Than 1 accessory is to be used you then need to purchase a multi adapter.

To attach a flag assembly or other accessories, we suggest putting the bracket on the edge of the bar, this way you can keep the basket on the scooter as well.

Dealer Bulletin # DB2025-05 Phantom Accessory Fitting
