

Dealer Service Bulletin # DSB135

Incorrect Speedo Reading (Albatross, Emperor & Phantom)

If you have a speedo that is showing a much lower or higher speed on the Dash than what you believe the scooter is actually doing, please check the below settings.

Speed Adjustment Settings Refer to the Speed

Firstly press the mode and setting button at the same time and ask another person to turn on the key switch, then release the button. See (fig 1)

(Fig 1)

There will be a number flashing on the screen, If it is not already showing 32 adjust it by pressing the left or right turn button see (fig 2) until the number is 32. (Fig 3)

(Fig 2)

(Fig 3)

Dealer Service Bulletin # DSB135

Incorrect Speedo Reading (Albatross, Emperor & Phantom)

Once you have set this number @ 32 you can cycle through by pressing the green “SET” button (Fig 4) until you go back to normal screen. See (Fig 5 main screen)

(Fig 4)

(Fig 5)
